

**Governor Schwarzenegger,
What is going to happen to us when we get
sprayed over and over again?**

Do you really know?

Apple Moth Pesticide Spraying

The Schwarzenegger administration is spending \$500,000 to convince us being sprayed with their pheromone-pesticide is safe – the State's own data shows they never actually tested it for human or environmental toxicity.

TAKE ACTION!

Go to lbamspray.org or stopthespray.org for quick information, petitions to sign, examples of letters, and addresses for political representatives.

Call your local, state, and federal representatives today!

PLEASE, DON'T SPRAY US!
